## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/24/2007 has been entered.

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Seth S. Kim on 11/30/2007.

The application has been amended as follows:

Claims 32 and 34 have being cancelled.

In claim 1, line 13 of the claim the passage "during finalization of the disc," has been deleted.

*Allowable Subject Matter*

Claims 1, 2, 7 and 19, 20, 29 and 30 are allowed.

The following is an examiner's statement of reasons for allowance:

The claims are allowed as the prior art does not teach or suggest the applicant's invention. The amended claim language and the applicant's remarks in response to the Office Action distinguish the application's invention over the references that accompanied the Office Action.

In regard to claim 1, the prior art made of record fails to teach or fairly suggest in combination with the other elements of the claim, the at least one of the lead-in area and/or the lead-out area further comprises a defect management area, and a last temporary defect information and a last temporary defect management information, which are last recorded in the temporary defect management area, are recorded as defect information and defect management information in the defect management area.

In regard to claim 19, the prior art made of record fails to teach or fairly suggest in combination with the other elements of the claim that the controller, during finalization of the

disc, record a last recorded temporary defect information and a last recorded temporary defect management information in a defect management area which is present in at least one of the lead-in area and/or the lead-out area of the disc.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
